• Polishing sponges 2.5 cm with velcro

Smooth - designed for polishing automotive lacquers and various lacquer coatings

White polishing sponges – high hardness sponge. Usually used with pastes P01 and P03.

Yellow polishing sponges – medium hardness sponge. Usually used with pastes 1 STEP and P06.

Black polishing sponge – soft sponge. Usually used with paste P10.

Profiled – limit the hologram effect, paste splashing during polishing, assuring its proper dosing.

Yellow profiled sponges – medium hardness sponge. Usually used with pastes P03 and P06.

Blue polishing sponges – medium hardness sponge. Usually used with pastes 1 STEP, P03 and P06.

Black polishing sponge – soft sponge. Usually used with paste P10.

Advantages:

- **sponge thickness 2.5 cm assures precise polishing machine operation**
- **possibility of polishing hardly accessible spots, e.g. door handles, recesses and other car body profiles**
- **velcro fixing assures easier and faster replacement with another hardness**
- **sponge is easy to keep clean (may be washed and squeezed)**
- **products may be used as the replacements for other sponges, available on the market**

APP no.	Name	Diameter	Thickness	Type	Fixing
080105	White polishing sponge – hard	150 mm	2,5 cm		velcro
080403	Yellow polishing sponge – universal	150 mm	2,5 cm		velcro
080305	Black polishing sponge – soft	150 mm	2,5 cm		velcro
