

- **NTools FDS 2000 Plus**

The heater (2,2 kW) telescopic boom with adjustable time

APP Nr 190280P

FDS Infrared Fast Dry System is fitted with high quality reflectors and quartz radiators emitting short infrared waves. Thanks to these short waves infrared radiation penetration to the base of material is possible what prevents heating air around the lamp and dried object. Radiators enable quick and cost-efficient heating of fillers, primers and top coats.

FDS 2000 Plus Fast Dry System - fitted with two lamps with ensured control and large range of adjustment as well as telescopic boom that enables drying of any car body surface. The heating module may be positioned both vertically and horizontally. Time is controlled with an electronic control panel.

FDS 2000 PLUS filament bulb is available as a spare part under APP No. 190296

APP NO.	190280P
MODEL	FDS 2000 Plus
POWER	Single phase 220 V, 50/60
INPUT POWER	Hz
DRIED SURFACE	2 x 1100W
TEMPERATURE	1000mm x 800mm
TIME CONTROL	35-80°C
POWER CONTROL	od 1 do 99 min
